

Husson University's School of Pharmacy
Technician training immunization program information

Husson University's School of Pharmacy is offering immunization courses on a rolling basis for pharmacists, interns, and the 6-hour course for pharmacy technicians. Both of these programs are ACPE-approved and satisfy the requirements of the PREP Act. We are also willing to travel if there is a group of folks that need the training and space available for us to provide it.

The next technician course on 1/23/2021 at 9am at our campus in Bangor, ME. Accommodations can be made for people to attend the training remotely, but they do have to have a currently certified and licensed pharmacist available for the hands-on portion of the class.

We are also offering CPR courses, too. Here's some cost information:

- 20-hour course (for pharmacists and interns) - \$350
- 6-hour course (for technicians) - \$250
- CPR - \$50

Thank you for your time,

Kelsie Snow, PharmD

Assistant Professor of Pharmacy Practice
